

# Jenny Wong

## PROFILE

Detail-oriented UX/UI Designer passionate about crafting user-centered designs that highlight empathy and understanding. Proven ability in creating intuitive and visually appealing interfaces that enhance user experience.

## EXPERIENCE

### UX/UI Designer, Jun 2024–Present

#### Meetomate

- Designed and refined prototypes to align with user needs and business goals, streamlining workflows for the development team.
- Built and maintained a scalable design system for the MVP using Figma, ensuring consistent user experiences across devices.
- Presented design concepts and iterated designs based on user feedback, enhancing usability, engagement, and development efficiency.

### Educational Assistant, Aug 2023–Jun 2024

#### ProCare Therapy

- Cultivated trust with special needs students by employing a compassionate, user-centered teaching approach.
- Developed personalized lesson plans tailored to each student's learning abilities, resulting in measurable academic and social progress.

### Programming Instructor, Jun 2022–Sep 2023

#### Coding Minds Academy

- Delivered programming courses in Python, Flutter, JavaScript, and Scratch, fostering critical thinking and independent problem-solving.
- Redesigned the HTML, CSS, and JavaScript curriculum, boosting student engagement with interactive, real-world projects.
- Partnered with developers to create a visually cohesive exercise website, aligning with the academy's branding and user experience goals.

### UX/UI Designer | Project: ConnectMe Social App, 2022

#### Group project , 10-week sprint

- Created wireframes and prototypes to ensure seamless functionality and robust user security features.
- Developed a collaborative design system to guide team workflows and maintain design consistency.
- Refined features using user feedback, enhancing engagement with personalized filters and activity suggestions.

### UX/UI Designer | Project: Travel Planner App, 2021

#### Individual project

- Designed an app to simplify travel planning with AI-driven packing suggestions, backup plans, and healthcare resources.
- Improved usability by refining the app through user feedback, resulting in more intuitive travel and packing adjustments.
- Conducted user research to address travel pain points, ensuring familiarity by leveraging Google design systems.
